Norge Mining has created a new position as project director for the exploration projects in Dalane. Tim Galusky has gotten the job.

American Tim Galusky has for the past 25 years worked on mining projects in North and South America and in Africa. Among other things, he has worked on the expansion of a gold mine in Mexico, as project manager for a gold mine in Argentina and as project manager at a copper mine in Chile.

He has now been appointed to lead the development of Norway Mining's project in Dalane. Galusky has been given the role of project director, a newly created position in Norway Mining's management.

## **Will lead the project towards mine construction**

According to a press release from the company, he has experience in leading major projects in the mining industry from the concept phase to development and operation. This is what will be his mission even now – he will lead Norge Mining's development through initial and final feasibility study, further planning and application processes and to the development and start-up of the company's first mine.

"We are delighted to appoint Tim Galusky as our Project Director, a new role that underlines the progress of our exploration work. Tim has gained considerable international experience in project management and consultancy work over 25 years. He has an impressive track record in terms of safety, quality and best practices, as well as a strong commitment to sustainability," said John Vergopoulos, CEO of Norway Mining.

Norway Mining has acquired 61 exploration licences in Norway, most of which have been acquired in Eigersund, Bjerkreim, Sokndal and Lund. In addition, they have acquired some exploration licences in Bømlo. The company has long worked particularly on mapping the mineral deposits at Helleland and Ualand, where they estimated last year that [there are at least 70 billion tonnes of mineral ore.](#)
